

Information About This Service

Service Description

The Fibre Ethernet Broadband is a fibre connection from your premises to the network, capable of delivering 10Mbps to 1000 Mbps symmetrical speed in available areas from a variant of carriers.

Availability

A site qualification is required to fathom speed availability and quality. Please ask for details when enquiring about this service – we offer a full free qualification service.

Equipment Required

A router is required on the premises.

Minimum Term

The contract is for about 24 or 36 months including (Services). Install fees apply for services of less than 36 months.

Bundling Arrangements

No bundling is required with this service.

Information About Pricing

Please choose a speed and term that you require and then add the cap data bundle to that access cost for your monthly charge
