Information About This Service

Service Description

NBN fibre-optic cables deliver broadband directly to your premise depending on the service available. We can check this free of charge and let you know which services are available. Fibre to the premises (FTTP) is connected by Ethernet cable.

Availability

NBN is available in selected areas of Australia. To check availability visit: <http://www.nbnco.com.au/learn-about-the-nbn/rollout-map.html>

NBN Speed

5 NBN speeds are available to use. The speed differs due to factors such as the type or source of content being downloaded, hardware and software configuration and the number of users at any given time. When multiple devices are connected to Wi-Fi, you may experience slower speeds. Connection is dependent on the Ethernet cable. Please see the pricing chart for available speeds and data caps.

Equipment Required

To set an NBN network you need an NBN compatible router to connect the devices to the broadband service.

Minimum Term

The minimum term contract is 12 months.

Information About Pricing

Please select the Speed and Term that you require and then add the Data Cap's Monthly access fee to ascertain your monthly charge.

Access Pricing

Speed	TBA	Monthly access fee ex GST	Term	Service Type	Access Type
12/1 Mbps	Install charge	\$ 75	12 months	NBN	Fibre
25/5 Mbps	TBA	\$ 80	12 months	NBN	Fibre
