Access Pricing

NBN Plan Type	Download/Upload Speed	Monthly access fee ex GST
NBN LITE	50/20	\$ 60
NBN BUSINESS	100/40	\$ 70

Data Cap Pricing

Data Packs	Monthly access fee ex GST
200Gb	\$ 30
500Gb	\$ 40
1Tb	\$ 50
Unlimited	\$ 80

Excess Data

\$19.50 per Gb ex GST will be charged on all plans if you exceed your allowance. Nextel will notify you when you reach 80% of your allowance. Plans can be upgraded but not downgraded at any time.

NBN Contract

NBN tails carry a 12, 24 or 36 month contract depending on your needs.

Installation fee	
12 Months	\$ 299
24 Months	\$ 199
36 Months	\$ 0

The NBN may charge a once-off \$299.00 fee. We are not forewarned of this and it is beyond our control. The charge appears under the title 'NBN Development Fee' and is related to the installation. Unfortunately this charge does appear occasionally and if so, will be passed on to the customer at cost only.

SIP Plans

What sets Nextel apart from its competitors is that we do not offer contract terms on our SIP trunks. As technicians, we don't believe in lock-in contracts. If you are unhappy with the performance of the trunks or feel we have misrepresented ourselves in any capacity, you are free to take your lines and change providers without penalty.

Plan	Cost			
SIP Focus	\$ 12.95 PAYG	L 0.08c Flat	N 0.06 c/m timed	M 0.13 c/m timed
Local & National*	\$ 24.95 Per SIP Trunk	L Included	N Included	-

SIP Mobile50	\$ 50 Includes \$ 150 mobile credit			
SIP Mobile75	\$ 75 Includes \$ 225 mobile credit			
SIP Mobile100	\$ 100 Includes \$ 300 mobile credit			
13/1300	.35 cents Flat			
1800	Free			
IDD	As tariffed			
Inter Network	Calls to other sites on our network are free			

* Fair Use policy applies. See nextel.com.au/policies for more details.

2020 NBN/SIP Ready NEC Telephone Systems

NEC SL2100

The SL2100 is an entry level out of the box, NBN ready “box on wall” telephone system. It comes CPU equipped with 4 SIP trunks for calls and can be expanded to 8.

Features include:

- Music on hold
- Auto attendant
- Audio conferencing

We like to offer this system to small micro businesses that are either budget-centric or just starting out. It’s a reliable little system but if you’re an established business used to powerful telephony platforms, this one isn’t for you.

NEC SV9100

The SV9100 is a powerful workhorse that will support your business for 10+ years. It has all the smarts of being NBN ready including:

- Expandability to almost infinite trunks and extensions
- Easy to use voicemail and automated attendant
- Networkable across multiple sites.

It is approximately 40% more expensive than the SL2100 but this cost is justified by extra features, benefits and increased quality of the system and handsets. This is one of the most stable telephony platforms we’ve seen since the early 90’s. When teamed with our SIP trunks + NBN solution, this system delivers incredible reliability and is 100% user-friendly.
